A collection of public affairs lectures, panels and events from academic institutions all over the world, available for viewing, listening, streaming or downloading.' UChannel (or University Channel) is a project of Princeton University's Woodrow Wilson School of Public and International Affairs.

**C-SPAN CLASSROOM** [Real Player, Windows Media Player]

<http://www.c-spanclassroom.org>

Over the past several decades, C-SPAN has brought many hours of fascinating programming to the generally curious. Many teachers have used their programming to edify their students about various aspects of US government, and now C-SPAN has created this very nice site to complement those informal activities. The formal mission of the C-SPAN Classroom site is "to enhance the teaching of Civics & U.S. Government through C-SPAN's primary source programming." Visitors can start their journey by viewing the "Clip of the Week", and then looking through the other thematic sections on the site, which include "Principles of Government", "Legislative Branch", and "Political Participation".

Along with each clip, users can also view a short clip description, and take advantage of the discussion questions as well. Visitors will need to complete a short free registration form to access all of the clips, and this only takes a few minutes. This site is quite a delight, and for anyone who teaches civics and related fields, it will most likely become an essential online resource.

Educators who teach political science, civics, or United States government should find this site as handy and enjoyable as the Scout staffers did.

**BLINKX: Search for Educational Videos using one of the best search engines just for videos:** <http://blinkx.com/>

Blinkx is the world's largest and most advanced video search engine. Fed by automatic spiders that crawl the web for audio video content and having content partnerships with over 200 leading media companies, blinkx uses advanced content analysis to better retrieve educational content.
